

WHAT WE OFFER?

Tristar is a well known and respected lab because it has the latest technology, equipment and materials to fabricate excellent dental restorations. All the products we offer are carefully selected and researched to make sure that they have a positive clinical history. Once we select the product, the technicians in charge of the process get the proper training and certifications so that the dentist get all the benefits of a high tech restoration, such as:

- Z MAX Solid (Full Zirconia)
- Z MAX Layered
- Procera
- IPS e. max Empress & CAD
- Implants
- Ceramage
- Tescera
- Bio 2000
- Full & Partial Dentures
- Dentsply Lucitone FRS
- Valplast
- Nightguards
- Simple orthodontics and more...

OUR HISTORY

Tristar was started in August 1987 by three experienced dental technicians and two successful businessmen who were convinced that the manufacturing of dental restorations could benefit from applying sound proven business and production practices. The final result: beautiful restorations at undisputable value to our dentist.

We've implemented sound business and production practices, such as adhering to procedures, reducing lost time and balancing flow in production lines. We compare daily statics, use state of the art technology and have a continuous training program. This has resulted in high quality affordable dental restorations.

Today we have a 80 technicians certified by PTC (Productivity Training Corporation) and two CDT's we are happy and proud to be one of the most successful labs int North America serving the need of over 1000 dentists.

WHO WE ARE?

We are a dental laboratory with more than 31 years experience with a team of over 100 dental technicians dedicated to the fabrication of one of the best dental restorations in the market. We achieve this by using the best ADA certified materials, state of the art technology and constant training.

Tristar Dental Laboratory is a PTC certified lab with two full time CDT's. Our lab is also certified in such high tech restorations as Z-MAX Solid & Layered Zirconia, Procera, IPS e.max, Bio 2000 and other products.

Our dental technicians have an average of 20 years experience in the fabrication of dental prosthesis. Over 15,000 restorations have passed on average through their hands. Their extensive experience guarantees unmatched esthetics, fit and consistency.

OUR MISSION

To deliver on time consistently fitting, quality restorations as well as provide service and technical support beyond our dentist expectations.

Fee schedule 2018

WARRANTY - 5 YEARS

Quality is certainly an overused word and its terms detailed in fine print. Because we believe in our product and are behind our dentists, we offer what we believe is the most generous **warranty** in the labs industry.

If your case fails for any reason in the next **5 years**, simply return the old case and the warranty and we will remake it a no charge. The only restorations excluded from this warranty are veneers, temporaries, night guards and removable prosthesis.

TURNAROUND TIME - 10 WORKING DAYS

We have a **10 day** in lab turnaround for most restorations. The exceptions are bridges over 6 units and combined cases wich require additional time.

SHIPPING - WE PAY FOR IT

No surprises or hidden costs. We pay shipping both ways. Simply call 281-968-0719 or 1-800-524-7247 and we will send you Rx's, labels, boxes and air bills.

TERMS

Net amount of invoice is due within 30 days of receipt of the work. All balances beyond 30 days are subject to monthly finance charges of 1.5% of the unpaid balance. Prices are subject to change without notice.

FIXED PROSTHESIS

State of the art restorations, the most esthetic money can buy. Z-MAX, Lava and Procera are metal free zirconia restorations based in the most advanced CAD/CAM technology. IPS e.max CAD & PRESS by Ivoclar is made with Lithium Disilicate, which is a high strength ceramic that results in beautiful restorations. Bio 2000 has a very high gold core. All of the above are finished with low abrasive and low fracture porcelain.

HIGHLY ESTHETIC METAL FREE RESTORATIONS

Ivoclar IPS e.max PRESS crowns and bridges (Per unit)	\$ 99
Ivoclar IPS e.max CAD crowns (Per unit)	\$ 114
Tristar Z-MAX SOLID zirconia crowns and bridges (Per unit)	\$ 99
Tristar Z-MAX zirconia LAYERED porcelain crown and bridges (Per unit) ...	\$ 124
Procera zirconia crowns and bridges (Per Unit)	\$ 134

HIGHLY ESTHETIC PORCELAIN FUSED TO GOLD

Bio 2000 Goldtech Argen (99% Au Alloy included)	\$ 184
--	--------

The following "classic" restorations are made with the world's best dental alloys from Argen. We use low abrasive, low fracture feldspathic porcelain from Shofu to produce high value, esthetic and natural restorations.

PORCELAIN FUSED TO METAL

Non precious standard	\$ 89
Noble white gold Premium Value	\$ 97
High noble white gold Premium	\$ 124
High noble yellow gold Elite	\$ 197
(Alloy included up to 40 grains, gold surcharges may apply)	
For metal occlusal add \$15 for noble and \$25 for high noble	

FULL-CAST CROWNS

Non precious	\$ 83
Full silver crown Ag	\$ 86
Full gold crown 40% white	\$ 151
Full gold crown 63% yellow	\$ 186
(Alloy included up to 45 grains, surcharges may apply)	

CROWN & BRIDGE EXTRAS

Porcelain butt margin	\$ 29
Cast post (add \$20 for precious metal)	\$ 34
Wing or rest (add \$15 for noble and \$25 for high noble)	\$ 20
Diagnostic wax-up (Per Unit)	\$ 29
Attachment ERA or Ney	\$ 95
Attachment labor	\$ 39
Rush charge 6 working days	\$ 65
Rush charge 5 working days	\$ 77
Pink tissue (Zirconia)	\$ 41
Pink tissue	\$ 29
Reduction coping	\$ 33
Metal coping	\$ 54
Porcelain application	\$ 49

OTHER FIXED PROSTHESIS

We use two composite resins: Tescera by Bisco and Ceramage by Shofu. Tescera uses an oxygen free environment for optimal surface properties and esthetics. Ceramage is the only indirect composite resin using 74% zirconium silicate.

VENEERS, INLAYS / ONLAYS

Ivoclar IPS e.max PRESS	\$ 99
Ivoclar IPS e.max CAD	\$ 109

INDIRECT COMPOSITE (crowns & inlays/onlays)

Ceramage - 74% Zr. silicate (Per unit)	\$ 78
Tescera (Per unit)	\$ 74

TEMPORARIES

Tristar Triad temporaries	\$ 40
Radica highly esthetic long term	\$ 54

IMPLANTS

We have 28 years of experience working with implants and are certified by Nobel Biocare and Straumann, from whom we receive continuous training in new technologies. Of course, we also work with other implants such as Biomet 3i, Imtec, Astra-Tech, Zimmer, etc.

Implant PFM crown over stock abutment in mouth	\$ 89
Implant PFM crown over custom abutment	\$ 94
Implant metal structure (Custom abutment per unit)	\$ 73
Implant porcelain application to metal structure	\$ 63
Implant zirconia crown over stock abutment in mouth	\$ 124
Implant zirconia crown over custom abutment	\$ 151
Implant porcelain application to zirconia structure	\$ 78
Implant labor	\$ 46
Custom casted Hader bar (per connection)	\$ 105
Hader bar kit	\$ 155
Hybrid acrylic denture	\$ 750
Hybrid acrylic partial	\$ 380

Abutment, analog or screw not included / Alloy not included

CUSTOM ABUTMENTS CAD/CAM OR SLM SYSTEM

Cr-Co custom abutment over implant (per unit)	\$ 220
Zirconia custom abutment over implant (per unit)	\$ 230
Titanium custom abutment over implant (per unit)	\$ 240
Extra fixation screw	\$ 35

All the abutments include fixation screw

OVERDENTURE OR HYBRID BAR CAD/CAM SYSTEM

Cr-Co bar (per implant)	\$ 230
Titanium bar over 2 implants	\$ 610
Titanium bar over 3 implants	\$ 910
Titanium bar over 4 implants	\$ 1,220
Titanium bar over 5 & 6 implants	\$ 1,500
Titanium bar over 7 & 8 implants	\$ 1,800

*All the bars include fixation screw per implant
Full denture not included.*

REMOVABLE PROSTHESIS

We make two types: soft and hard. Soft are made with Valplast and Lucitone FRS, a flexible thermo-nylon that is comfortable and easy to clean and that provides good retention and outstanding esthetics. For the hard one we use Diamond D because of its handling and finishing properties, better fit and high tooth to base adhesion.

METAL FREE REMOVABLE PARTIALS

Lucitone FRS or Valplast unilateral partial	\$114
Lucitone FRS or Valplast bilateral partial	\$184
Wax Try-in	\$ 104
Process from Wax Try-in.....	\$ 94

CAST METAL PARTIAL AND FLEXIBLE MATERIAL

Metal sub frame Lucitone FRS or Valplast	\$ 254
Framework Try-in (+ 15 for bite rim)	\$ 104
Add teeth to framework	\$ 74
Framework with Wax Try-in with teeth	\$ 124
Process to finish	\$ 144

FULL DENTURES ACRYLIC

Diamond D high impact	\$ 174
Wax Try-in	\$ 104
Process from Wax Try-in	\$ 94

METAL AND RIGID ACRYLIC

Combination Diamond D and metal	\$ 184
Framework Try-in (+ 15 for bite rim)	\$ 104
Add teeth to framework	\$ 74
Framework with Wax Try-in with teeth	\$ 124
Process to finish	\$ 94

Note: We use resin teeth made by New Stetic. For both our partials and dentures. The New Stetic teeth are high quality ISO 14001 certified teeth.

GUARDS AND SPLINTS

Transparent night guard Acrylic Diamond D	\$ 60
Transparent night guard sheet tray soft or hard	\$ 40
Transparent night guard dual soft or hard	\$ 74
Bleaching tray	\$ 40

REMOVABLES EXTRAS

Custom tray	\$ 22
Impak soft reline	\$ 56
High reline Diamond D	\$ 45
Wire reinforcement	\$ 22
Repair partials	\$ 53
Acrylic flipper up to 1 tooth	\$ 53
Acrylic partial up to 4 teeth	\$ 89
Acrylic partial up to 10 teeth	\$ 121
Adapt crown to partial	\$ 25
Partial rest	\$ 18
Wax rim	\$ 15
